Art Unit: 1771

DETAILED ACTION

- 1. In view of the Appeal Brief filed on 7/19/2004, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.
- 2. To avoid abandonment of the application, appellant must exercise one of the following two options:
- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
 - (2) request reinstatement of the appeal.
- 3. If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Specification

4. The disclosure is objected to as being partially incomprehensible. The following item is not understood: A low refractive index layer being formed of fluorine-base acrylic resin or silicon resin. Paragraphs [0024] and [0025] fail to comprehensively disclose what constitutes a low refractive index layer being formed of fluorine-based acrylic resin or silicon resin. Is a fluorine-based acrylic resin, a fluorine-based silicone resin, and/or a silicon resin (not fluorine-based) considered a low refractive index layer? What constitutes a fluorine-based acrylic resin or a fluorine-based silicone resin? In addition, paragraph [0025] speaks of "the particles," but the paragraph does not provide antecedent basis for "the particles." Are the particles necessarily present in the fluorine-based acrylic resin or silicon resin? What constitutes a particle of fluorine-based resin or silica based-resin? In addition, fluorine is a diatomic gaseous element. It

Application/Control Number: 09/987,971

Art Unit: 1771

does not polymerize. As such, fluorine-based resin is not understood as fluorine cannot form the base for a resin.

5. Applicant is requested to submit an amendment that clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art. Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 7. Claims 1 and 14-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. The specification fails to describe an acrylic resin with fluorine or silicone resin and further including particles of fluorine resin. See above objection. In addition, what constitutes a particle of fluorine resin?
- 8. Claims 1 and 14-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to describe an acrylic resin with fluorine or silicone resin and further including particles of

Page 4

fluorine resin in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. See above rejection and objection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew T Piziali whose telephone number is (571) 272-1541. The examiner can normally be reached on Monday-Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (571) 272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
